HiHi for Business

INTRODUCING HiHi2

Faster, brighter, bolder

Powered by Android Oreo 8.1, the operating system that enables you to work faster.

Built with the Qualcomm® Snapdragon™ 625 processor and an integrated Qualcomm® Adreno 506 GPU, HiHi2 delivers a powerful premium experience with a dazzling display, without draining its battery. A full 10.1" touchscreen with an intuitive user tablet interface and a 13MP front-facing camera to capture all your facial expressions, HiHi2 lets you experience video calling in a highly immersive way.

PROCESSOR
Qualcomm®
Snapdragon™ 625

Power where you need it most: HiHi2 comes with the latest Qualcomm® Snapdragon™ chip. It is designed to support a high-value combination of advanced features, leading performance, robust connectivity and all-day battery life in leading devices.

POWERED BY
Android
Oreo 8.1

Enjoy the latest built-in features of the eighth major release of the Android mobile operating system in HiHi2.

TOUCH SCREEN
HD bright TFT
10.1" display

HD bright TFT displays are suitable for use as an outdoor or window display. HiHi2 comes with an incredible high-resolution screen with a great viewing angle for those all-important video calls.

PHONE FEATURES

An intuitive experience

HiHi2 is a premium business phone which has been designed and developed in Great Britain. Incorporating essential phone features with an intuitive high-definition touchscreen display powered by Android, HiHi2 is an innovative device that gives you a sleek user-experience in a modern and stylish product.

HiHi2 provides you with lots of helpful software which has been designed to make your business life easier. Find out which colleagues are available for a call, effortlessly transfer calls internally or externally and easily access contacts.

CONTACTS

HiHi2's Contacts are incredibly intuitive to use, giving you the ability to search by typing in a name or the start of a phone number to find someone quickly, as well as scrolling through your full alphabetical list of contacts.

VOICE & VIDEO CALLS

You can make high quality voice and video calls with HiHi2. Whether you are having a team discussion or a one-to-one call, HiHi2 allows you to see availability with Presence, a traffic light system showing which colleagues are available.

VOICEMAIL

HiHi2 easily lets you track through your voicemail messages, so you can listen to the important parts again without having to repeat the message in full. When you're on the move you can set up email notifications, allowing you to receive your messages as playable files to your email.

CALL FORWARDING

If you're going to be away from your desk, HiHi2 lets you easily divert your calls to a colleague or your mobile, ensuring that all calls through to your deskphone will be answered. You can also divert your calls to your voicemail if you would rather your calls be kept private.

FAVOURITES

Adding someone as a Favourite contact means that you can quickly and easily call them in just two touches. People you speak to everyday can be added to your Favourites list, which can be added as a widget on your homescreen.

Easily create a single address book for all your contacts

PHONEBOOK

Connect your contacts

HiHi2 gives you the ability to have all of the contacts that you want added to your device. Creating a global business address book allows you to sync all of your contacts into one single list. This can include employees and suppliers, giving you access to their numbers and emails at the touch of a button, whether you are in the office or on the move.

If you opt to add your Google account to your HiHi2, all of your contacts from your account will sync into your Contacts list. You can also opt to add in other contacts from accounts such as Outlook, Office 365 or your existing business database. Any contacts imported to your HiHi2 will be held locally on your device, meaning that only you have access to those contacts.

You can also easily add in contacts locally to your device by manually saving their details from your recent calls. When you add a contact, you can assign an avatar to that person's profile which will be seen every time they call. You can also personalise ringtones based on certain callers to help identify people easily.

Office 365

VIDEO CALLING

Face-to-face business meetings

Connect with your customers on HiHi2, a fully connected device that allows you to make and receive video calls with our high-quality H.265* video between HiHi devices.

The best business relationships are built face-to-face, which is why HiHi2 comes built-in with video technology, to allow you to see what's really being said and to build on genuine relationships with your colleagues, suppliers and customers.

Video calling helps to bridge the gap between a voice call and being in the same room as someone, giving users the ability to have face-to-face meetings without the need to travel long distances, saving you both time and money.

**Mind-blowing
clarity with H.265
video calls***

HOT DESKING

Flexible working

HiHi2 makes hot desking easy and accessible. All of your contacts and information are stored within the removable tablet, so if you wish to work from an alternative location, you can easily take your tablet, giving you access to your contacts when you need to make calls.

This functionality makes it easier to work from a variety of locations within your office, such as different desks or different rooms. You can also use your HiHi2 from home, helping you to stay in contact with all of your colleagues, even when remote working.

HiHi2 connects to wireless Bluetooth headsets, giving you the ability to use your computer while still on calls, and the freedom to move around.

YOUR PORTABLE TABLET

From work to home

HiHi2 makes working from home a lot easier, both for those planned remote working days and for those unexpected times. Built with the Qualcomm® Snapdragon™ chip, which is designed to support robust connectivity, an all-day battery life, and leading performance, HiHi2 gives you a powerful premium experience to work from.

As a portable device, HiHi2 ensures that you can always stay connected to others with all contacts stored in its removable tablet, giving you access to your saved numbers and emails from wherever you are. This gives you the advantage of having all your colleagues' contact details on your device, meaning that when working remotely, you can remain in easy contact with them via voice or video calls.

HiHi2 can be more than just a portable device for making and receiving calls, though. When working, it can give you the benefit of an extra screen, whether that is for your emails, a piece of work you need to easily refer to, or just for easy access to the internet. It gives you the opportunity to go paperless: instead of carrying around copies of documents, you can easily store them in your Google Drive so they're always there as and when you need to discuss them. With HiHi2's Bluetooth connectivity, you can connect a keyboard folio to it, giving you a greater typing experience for note-taking and document editing. These also double as great covers for your device, meaning your HiHi2 is protected on the journey to and from work and around the house.

A device as mobile

Face-to-face video calls

Instant video,
to anyone, anywhere on
any device

UNIFIED COMMUNICATION

HiHi There

HiHi There is our mobile app that allows you to invite anyone to a video call, anytime and anywhere. Imagine being able to communicate with your customers in this unique way.

As a HiHi2 user it couldn't be simpler: just send your contact an email or text invitation to download the HiHi There app. This invitation includes a unique link for the recipient, and once they've successfully downloaded the app, they can call you using the link and enjoy face-to-face communication from wherever they are. HiHi There works on any video-enabled device (smartphone / tablet) as well as desktops and laptops with webcam functionality through the browser, giving you the freedom to communicate with anyone.

Video communication helps to create a more immediate rapport with business partners and customers alike, by being able to see more of what is really being said. This is great for people who are looking to reduce their travelling time, as it gives you a way to both speak and see people on the phone. This could be perfect for recruiters / hiring managers who want to both see and speak to candidates, or for those who are wanting to show their work to potential customers.

UNIFIED COMMUNICATION

HiHi Connect

HiHi Connect allows you to use your mobile as an extension of your HiHi2. If you're away from your desk when your HiHi2 rings, you can simply answer the call on your HiHi Connect app on your mobile, which also offers video calling functionality.

HiHi Connect uses all of your HiHi2's features so you can use your deskphone on your mobile. You'll be able to see your full contact list, while also seeing who out of your colleagues is available for a call, thanks to the Presence checker. Easily hold calls, transfer them both internally and externally, and move calls between your HiHi2 and mobile, giving you greater freedom when on a call. HiHi Connect also offers instant messaging, as well as the ability to make and receive both voice and video calls, giving you a range of options for communicating with your colleagues.

HiHi Connect allows you to display your main business number when calling from your mobile, creating a more professional appearance for your business clients and partners. It's the perfect option for those who work remotely but regularly communicate with their office-based colleagues. It can help you easily communicate and see what is going on in other locations such as at the warehouse or with your engineers or field staff.

MORE THAN JUST A PHONE

Your device, your way

Remote and flexible working is continuing to rise, aided by the growth in connected technologies, collaboration tools and video calling functionality. HiHi2 gives you the freedom to have access to this, helping you in today's business world.

HiHi2 gives users access to a range of apps and functionality which help you stay in contact whether you are at work or at home. It doesn't have to stop there though! HiHi2 is yours to personalise however you see fit, giving you access to the Google Play Store and the freedom to install a range of third-party apps, helping to bridge the gap between work and home. There might be a specific app that could help increase your productivity, communication, flexibility and potential selling; with HiHi2 you have access to a world of apps to download at your fingertips, to help you wherever you are doing business.

Improve your workflow by installing some of our favourite third party apps* onto your new HiHi2.

A World of Apps

*HiHi does not offer technical support for third-party applications. HiHi cannot guarantee the optimisation of apps on the HiHi2 device.

That winning video pitch

Video call home whilst working away

Engage more with customers

Screen sharing important figures

Video calling remote teams

Freedom with widgets

Automate your schedule

Connect with Google

Google Play Store gives you the ability to personalise your HiHi2

GOOGLE CERTIFIED

“Okay Google...”

HiHi2 is a certified Google device, giving you access to Google Play Store and its suite of apps, all secured by Google Play Protect.

GOOGLE PLAY STORE

By logging into your Google account, you'll have access to your emails, calendar and Google Drive, along with a host of apps which you can download onto your HiHi2, to use wherever you are.

GOOGLE ASSISTANT

HiHi2 contains your own virtual assistant, if you want it. Using voice commands, Google Assistant can help you with a variety of day-to-day activities, all without the need to switch between various apps. Google Assistant tailors the information and responses based on your voice profile, meaning you'll get the information specifically designed for you.

HOME SCREEN WIDGETS

Personalise your home screen with widgets. A widget is a simple app extension of a larger app which has been downloaded to your device. They come in all shapes and sizes, many are customisable and reside on your home screen, usually as a quick-access shortcut to the app. Personalise your device with weather updates, your schedule, to-do lists and many others!

for your home

INTUITIVE TO USE

HiHi2 at home for family and friends

The smartphone for your home...

HiHi2 is an innovative Google certified phone, which incorporates essential phone features with its intuitive high-definition touchscreen display powered by Android, making it as easy to use as a smartphone. Designed and developed in Great Britain, it's an innovative device that gives you a sleek user-experience in a modern and sophisticated product for your home.

HiHi2's software has been designed to make your life easier, giving you a premium user-experience along with its dazzling display. You can easily and quickly call contacts in just two touches by adding them to your Favourites widget on the homescreen. You can create a global address book, allowing you to sync all of your devices to a single contact list, enabling everyone to have access to numbers and emails from a single device. You can experience video calling in a highly-immersive way on the 10.1" screen, along with the 13MP front-facing camera which helps to capture all of your facial expressions.

Make the HiHi2 whatever you wish it to be, with access to Google Play Store and its millions of apps, giving you the freedom to download the ones that suit you and your family best. With the use of Google Assistant, HiHi2 can be at the centre of your smart home, helping you to manage your home, your schedule and your life!

BUILT-IN VIDEO CALLING

Stay connected to everyone

Hands-free video calling...

Your HiHi2 comes with built-in video calling functionality, allowing you to make and receive video calls between HiHi2 devices from the comfort of your own home, all with superior H.265* video quality.

As a cross-platform device, you can also video call non-HiHi2 users via our unique mobile app, HiHi There. As a HiHi2 user, you can simply send your contact an invitation to the HiHi There app from your device by inputting their mobile number or email address, which will send them a unique download link. Once they have the app installed on their video-enabled device (smartphone / tablet) or opened in their browser (on a desktop / laptop with webcam functionality), they can easily call you and enjoy face-to-face communication from wherever they are.

Designed to ensure that you experience seamless video calling, your HiHi2 is docked to a perfect angle for greater visibility, removing the struggle to find that comfortable viewing position when on a call. When in its base unit, it's the perfect device for hands-free video calling, and its incredibly high-resolution display is suitable for both indoor and outdoor use, giving you the freedom to undock the tablet and move around.

CREATE A SMARTER HOME

An always-on device

“Okay Google...”

HiHi2 is an always-on device which is integrated with Google Assistant*, giving you the ability to control your device and your smart home using voice commands. Your Google Assistant tailors the information and responses based on voice profiles, meaning you'll get the information specifically designed for you. You can add appointments to your calendar, listen to the latest news and watch cooking tutorials online, all without needing to touch the display.

HiHi2 makes controlling and monitoring your home simple and easy, with the freedom to centralize all your smart devices in one place for you to monitor and control. From security cameras, smart locks and lighting to thermostats and your smart speakers, you can control all your devices from your HiHi2.

By downloading the Google Home app onto your device, you can schedule your HiHi2 to give you updates on information via specific voice commands or at specific times. Create a “Morning” routine, so when you wake up, your device will quickly and easily update you on the weather, the traffic, and also control your smart devices within your home, without the need for you to ask.

*HiHi does not offer technical support for third-party applications.

SEAMLESSLY USE WITH OTHER APPS AND DEVICES

Let us entertain you

Stream your favourite playlists...

Use your HiHi2 to stream your favourite playlists or rock out to new tunes using your choice of music streaming services, all available to download from the Google Play Store*.

Easily stream music in your home with HiHi2's premium speakers, or connect your device to other music speakers with Bluetooth connectivity. To use HiHi2's smart device functionality, connect your Google smart speakers to your Google account, allowing you to synchronise your music to multiple devices so that it will play throughout your home.

With HiHi2's integrated Google Assistant, you can easily launch your music using voice commands, giving you the chance to play your choice without the need to touch the display.
